

Air Flow Measurement and Control

Volumetric Flows Under Control

Discover the advantages
www.belimo.us

BELIMO[®]

Efficient air flow control

Proper building ventilation requires modern, energy-efficient control devices that ensure demand-regulated operation from the air handling fan to the room to maintain the amount of outdoor air required for acceptable indoor air quality. Proper air system performance can be challenging. Belimo field devices can provide fresh air to zones to maintain optimum room climate and/or specified pressure ratio with minimal energy consumption. They are designed for comfort zones (offices, hotels) and sensitive working environments (industrial, pharmaceutical, or healthcare), delivering the right amount of air as needed.

Leveraging Building Data

Airflow and measurement actuators with BACnet MS/TP, Modbus RTU, or MP-Bus connections directly communicate with the Building Automation System (BAS). BAS integration leverages building data to enable optimizing ventilation rates based on fan loads, occupancy, or CO2 levels. Actuators can receive active sensor signals and pass them to the BAS, simplifying installation and saving valuable inputs and outputs. Select models offer Near Field Communication (NFC) for quick programming, commissioning, and troubleshooting.

“Belimo makes HVAC control devices that we can trust and provide a long-lasting system for our clients.”

Matt Paonessa, Project Engineer
Andersen Construction, Seattle, WA

System Performance

Belimo's actuators communicate directly with the Building Automation System (BAS) using BACnet MS/TP, Modbus RTU, or MP-Bus.

Energy Savings

Patented technology provides higher efficiency with lower power consumption and reduces carbon emissions over the product's life.

Controllability

Maintains pressure independent operation eliminating the need for manual balancing, reducing installation and commissioning.

Pressure independent airflow

VAV Compact

Belimo's proven VAV compact is a standalone networked damper actuator with an integrated differential pressure sensor to provide proper ventilation with low energy consumption regardless of pressure fluctuations in the system. The VAV Compact offers easy installation and commissioning for small-to-mid-size installation.

Using the Belimo Assistant App, ZTH handheld, or the PC-Tool with a graphical trend display, it's never been easier to set, commission, monitor, or evaluate Belimo actuators.

VAV Compact Applications

Volumetric flow control:
VAV/CAV, Position Control (Open Loop)

Direct connection

with the ZTH or PC-Tool on -MFT, -MP, and -MOD series actuators

Connection / functions

- AC/DC 24 V
- Step control: CLOSED, V_{MIN} , V_{MID} , V_{MAX} , OPEN
- Modulating control: $V_{MIN} \dots V_{MAX}$
- Switchable control: 0...10 V / 2...10 V
- BACnet MS/TP
- Modbus RTU
- Hybrid mode
- Belimo MP-Bus®

LED displays

Power and communication

Δp sensor

- D3, dynamic 0...2 in WC [0...500 Pa]
- Volumetric flow display (m^3/h , l/s, cfm)
- Δp display in WC, Pa
- Display of direction of flow

Manual gear release

Easy installation and troubleshooting.

NFC interface

Provides data access, field adjustable, commissioning and troubleshooting with the Belimo Assistant App and a smartphone

Maximum flexibility

VAV Universal

The VAV Universal product line with an integrated differential pressure sensor is the ideal solution for VAV, duct pressure, and room pressure applications. Two sensors are available: the D3 dynamic sensor for comfort applications and the M1 diaphragm sensor for polluted air.

Mechanical fail-safe, fail-safe, and quick running actuators are available. Sensor and communication modules are equipped with NFC capabilities as well as BACnet MS/TP and Modbus RTU functionality.

VAV Universal Applications

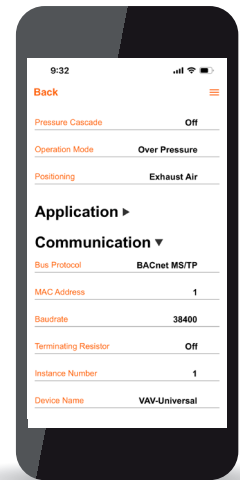

- Volumetric flow control:
VAV/CAV, position control (external VAV control), measuring volumetric flow
- Air duct pressure control
- Room pressure/room pressure volumetric flow cascade

Direct connection
with the ZTH or
PC-Tool

LED displays

- 24 V (status)
- Belimo Assistant App

NFC interface

Provides data access with the Belimo Assistant App and a smartphone

Connection / functions

- AC/DC 24 V
- Step control: CLOSED, MIN, MAX, OPEN, motor stop
- Modulating control: MIN...MAX
- Override control inputs: CLOSED, MAX, OPEN, motor stop
- Switchable control:
0...10 V / 2...10 V
BACnet MS/TP
Modbus RTU
Hybrid mode
Belimo MP-Bus®

Δp sensor

- D3, dynamic 0...2 in WC [0...500 Pa]
- M1 (R), diaphragm 0...2.4 in WC [0...600 Pa] (-.3... .3 in WC [-75...75 Pa]) for polluted fluid
- Volumetric flow display (m³/h, l/s, cfm)
- Δp display in WC, Pa
- Display sensor error, hose connection

Actuator Flexibility

Non fail-safe, fail-safe, and quick running actuators available

Quiet and discreet

CMBV

The CMBV is an air flow measurement and control system that combines several components into a single device: a flow anemometer, damper actuator, and integrated damper blade. Installed in the duct's interior, the CMBV maintains the exact air flow required with minimal energy and noise level. The CMBV is designed to reduce air resistance in comparison with conventional structures. With Belimo's communication protocol, MP-Bus, the duct temperature can also be measured, increasing the product's utility even further.

Exceptional service

At Belimo, we continually invest in new technologies that increase customer value by improving occupant comfort, energy efficiency, simplified installation, and maintenance-free operation. Our sales team is available to consult and provide insight and advice on how to achieve the best solution to help increase your system performance. Belimo will continue to focus on providing you with exceptional product availability, fast delivery times, and world-class customer service and technical support. We remain dedicated to continuously improve our standards and are committed to providing you the highest value possible.

Whatever your HVAC application, our global network of support experts are on hand and ready to assist.

5-year warranty

Global support

Tested quality

On-time delivery
