Product features

Default/Configuration	The default set up for a BGVL linkage will be factory installed along with a LV or SV series actuator. Included in the kit will be all the necessary hardware to facilitate mounting to the Belimo Globe Valve.
Application	The BGVL kit is designed to easily attach LV and SV series actuators to Belimo Globe Valves. The tapered bonnet and notched stem design allow easy installation of the BGVL on 1/2" to 2" two-way or three-way valves in both normally open and normally closed configurations.
Operation	The BGVL linkage with actuator will provide 20 mm of linear travel to accommodate a wide range of valve sizes.

Jacket the actuators input wiring with listed flexible conduit. Properly terminate the conduit in a suitable junction box. Rated impulse Voltage 800V. Type of action 1. Control pollution degree 3.

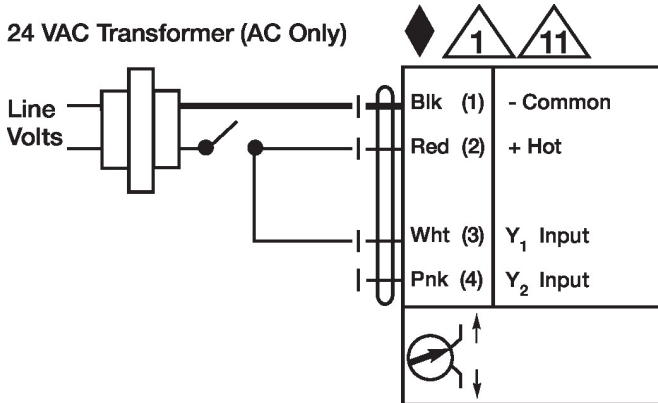

Electrical installation

✂ INSTALLATION NOTES

- ◆ Meets cULus requirements without the need of an electrical ground connection.
- ⚠1 Provide overload protection and disconnect as required.
- ⚠2 Actuators may be connected in parallel. Power consumption and input impedance must be observed.
- ⚠8 Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 V line.
- ⚠11 Actuators may be connected in parallel if not mechanically linked. Power consumption and input impedance must be observed.
- ⚠16 Actuators with plenum cable do not have numbers; use color codes instead.
- ⚠1 **Warning! Live electrical components!**
During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
