

#### Potable water valve, 2-way, Internal thread

- For potable water applications
- DVGW certified
- ACS certified
- WRAS certified
- Air-bubble tight

#### Type overview

| Туре      | DN |

| B2125PW-Q | 32 |

### **Technical data**

| Functional data | Valve size [mm]             | 1.25" [32]   |  |  |  |
|-----------------|-----------------------------|--|--|--|--|
|                 | Potable water certificate   | NSF/ANSI 61  |  |  |  |
|                 |                             | NSF/ANSI 372   |  |  |  |
|                 | Fluid                       | Potable water  |  |  |  |
|                 | Fluid temperature           | -4.0212°F [-20100°C]                                       |  |  |  |
|                 | Close-off pressure ∆ps      | 230 psi  |  |  |  |
|                 | Differential pressure ∆pmax | 25psi  |  |  |  |
|                 | Leakage rate                | 0%   |  |  |  |
|                 | Angle of rotation           | 90°  |  |  |  |
|                 | Pipe connection             | Internal thread  |  |  |  |
|                 |                             | NPT (female)   |  |  |  |
|                 | Installation orientation    | upright to horizontal (in relation to the stem)            |  |  |  |
|                 | Servicing                   | maintenance-free   |  |  |  |
|                 | Cv                          | 82   |  |  |  |
| Materials       | Valve body                  | Lead free and dezincification resistant bronze<br>(CW511L) |  |  |  |
|                 | Stem                        | Lead free and dezincification resistant bronze<br>(CW511L) |  |  |  |
|                 | Seat                        | PTFE   |  |  |  |
|                 | O-ring                      | EPDM   |  |  |  |
|                 | Ball                        | Chrome plated lead free brass                              |  |  |  |

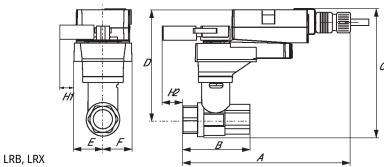

#### Safety notes

- The valve has been designed for use in stationary potable water systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- The valve does not contain any parts that can be replaced or repaired by the user.

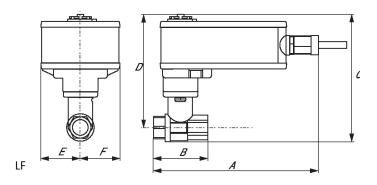

| Product features                     |   |  |  |  |  |
|--------------------------------------|---|--|--|--|--|
| Operating mode                       | The on/off ball valve is adjusted by a rotary actuator. The rotary actuator is connected by an on/off signal. Open the ball valve counterclockwise and close it clockwise.  |  |  |  |  |
| installation notes                   |   |  |  |  |  |
| Notes                                | The ball valve is a regulating device. To fulfil this control task in the long term, the circuit muse<br>be kept free from particle debris (e.g. welding beads during installation work).   |  |  |  |  |
| Permissible installation orientation | The ball valve can be installed upright to horizontal. The ball valve may not be installed in a hanging position, i.e. with the stem pointing downwards.  |  |  |  |  |
|                                      |   |  |  |  |  |
| Servicing                            | Ball valves and rotary actuators are maintenance-free.  |  |  |  |  |
|                                      | Before any service work on the control element is carried out, it is essential to isolate the rotary actuator from the power supply (by unplugging the electrical cable if necessary). Any pumps in the part of the piping system concerned must also be switched off and the appropriate slide valves closed (allow all components to cool down first if necessary and always reduce the system pressure to ambient pressure level). The system must not be returned to service until the ball valve and the rotary actuator have been correctly reassembled in accordance with the instructions and the pipeline has been refilled by professionally trained personnel. |  |  |  |  |
| Flow direction                       | Please also ensure that the ball is in the correct position (marking on the shaft).   |  |  |  |  |
|                                      |   |  |  |  |  |

**Technical data** 

Footnotes †Rated Impulse Voltage 800V, Type of action 1.AA, Control Pollution Degree 3

## **Electrical installation**

# X INSTALLATION NOTES

(A) Actuators with appliance cables are numbered.

(UP) Universal Power Supply (UP) models can be supplied with AC 24...240 V, or DC 24...125 V.

 $\bigwedge$  Provide overload protection and disconnect as required.

🔬 Actuators may be powered in parallel. Power consumption must be observed.

A Parallel wiring required for piggy-back applications.

Meets cULus requirements without the need of an electrical ground connection.

## Marning! Live electrical components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
