

## Potable water valve, 2-way, Internal thread

- For potable water applications
- DVGW certified
- ACS certified
- WRAS certified
- Air-bubble tight

5-year warranty

| Potable water certificate   | NSF/ANSI 61   |
|                             | NSF/ANSI 372  |
| Fluid                       | Potable water   |
| Fluid temperature           | -4.0212°F [-20100°C]                                    |
| Close-off pressure ∆ps      | 230 psi   |
| Differential pressure Δpmax | 25psi   |
| Leakage rate                | 0%  |
| Angle of rotation           | 90°   |
| Pipe connection             | Internal thread   |
|                             | NPT (female)  |
| Installation orientation    | upright to horizontal (in relation to the stem)         |
| Servicing                   | maintenance-free  |
| Cv                          | 82  |
| Valve body                  | Lead free and dezincification resistant bronze (CW511L) |
| Stem                        | Lead free and dezincification resistant bronze (CW511L) |
| Seat                        | PTFE  |

## Safety notes

**Materials** 

0-ring

Ball

• The ball valve has to be exercised at least once a week, so that the quality of potable water as well as the functionality are not affected.

**EPDM** 

Chrome plated lead free brass

- The valve has been designed for use in stationary potable water systems and must not be
  used outside the specified field of application, especially in aircraft or in any other airborne
  means of transport.
- The valve does not contain any parts that can be replaced or repaired by the user.

### **Product features**

### Operating mode

The on/off ball valve is adjusted by a rotary actuator. The rotary actuator is connected by an on/off signal. Open the ball valve counterclockwise and close it clockwise.

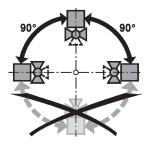

### **Installation notes**

### Notes

The ball valve is a regulating device. To fulfil this control task in the long term, the circuit must be kept free from particle debris (e.g. welding beads during installation work).

### Permissible installation orientation

The ball valve can be installed upright to horizontal. The ball valve may not be installed in a hanging position, i.e. with the stem pointing downwards.

## Servicing

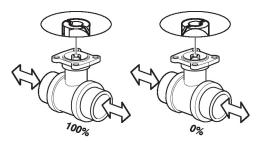

Ball valves and rotary actuators are maintenance-free.

Before any service work on the control element is carried out, it is essential to isolate the rotary actuator from the power supply (by unplugging the electrical cable if necessary). Any pumps in the part of the piping system concerned must also be switched off and the appropriate slide valves closed (allow all components to cool down first if necessary and always reduce the system pressure to ambient pressure level).

The system must not be returned to service until the ball valve and the rotary actuator have been correctly reassembled in accordance with the instructions and the pipeline has been refilled by professionally trained personnel.

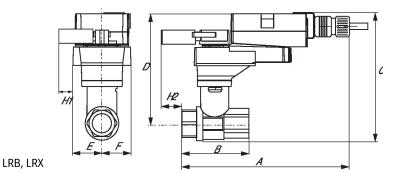

### Flow direction

Please also ensure that the ball is in the correct position (marking on the shaft).

### **Technical data**

**Materials** Housing material

Galvanized steel and plastic housing

Footnotes †Rated Impulse Voltage 800V, Type action 1.B, Control Pollution Degree 3.

### **Accessories**

| Electrical accessories | Description   | Туре     |  |
|------------------------|---|----------|--|
|                        | Battery backup system, for non-spring return models | NSV24 US |  |
|                        | Battery, 12 V, 1.2 Ah (two required)                | NSV-BAT  |  |

### **Electrical installation**

# **X** INSTALLATION NOTES

Provide overload protection and disconnect as required.

Actuators may be connected in parallel. Power consumption and input impedance must be observed.

🛕 Actuators may also be powered by DC 24 V.

Actuators Hot wire must be connected to the control board common. Only connect common to neg. (-) leg of control circuits. Terminal models (-T) have no-feedback.

Actuators with plenum cable do not have numbers; use color codes instead.

One built-in auxiliary switch (1x SPDT), for end position indication, interlock control, fan startup, etc.

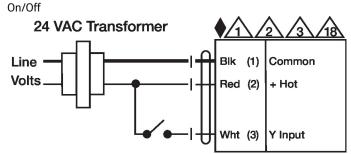

Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches. Mixed or combined operation of line voltage/safety extra low voltage is not allowed.

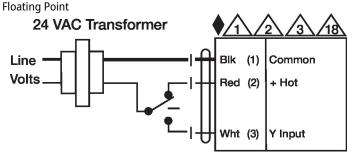

Meets cULus requirements without the need of an electrical ground connection.

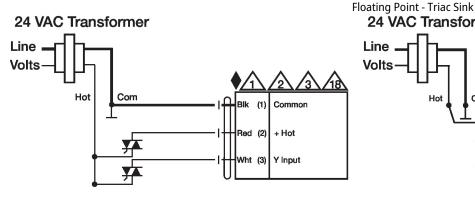

## Warning! Live electrical components!

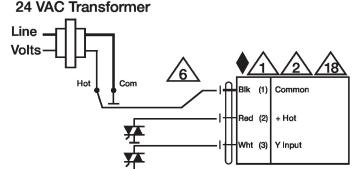

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
